Basic Requirements

This chapter contains basic software and hardware requirements for the Enterprise Architect Information Portal application to function properly.

- Required Hardware
- Required Software

Required Hardware

The Enterprise Architect Information Portal requires the following hardware to function properly.

Name	Minimum	Recommended
RAM	4 GB	8 GB
HDD	50 GB	150 GB
CPU	Intel® Pentium Dual-Core®	Intel® Pentium Dual-Core® (or better)

Required Software

The Enterprise Architect Information Portal requires the following software and libraries to function properly.

Supported databases:

Name	Minimum	Recommended	Description
MySQL	5.7.7.x	8.+	
PostgreSQL	12	14	
Oracle	12c+	2019	
MariaDB	10.1.2		Minimum or higher.
MSSQL	15	16 and higher	

Supported EA versions for EA Infoport purposes:

Name	Minimum	Recommended	Description
Enterprise Architect	16	17 (32-bit version)	The listed Enterprise Architect versions apply to the server on which the Infoport is running. The 64-bit version can also be used on client workstations.

MS libraries:

Name	Minimum	Recommended	Description
.NET	4.7.1		Only needed if ODBC drivers are required.
.NET CORE	6.x		**Not installed separately: it is included in the installation package!**

Supported operating systems

Name	Minimum	Recommended	Description
Windows Workstation (for portal installation purposes)	Windows 10 (1607+)	Windows 11	The portal can also run on an OS intended for workstations
Windows Server	Windows Server 2019	Windows Server 2022
