

Creating a database for an Enterprise Architect model

- Download the database script to create the necessary tables from https://sparxsystems.com/downloads/corp/scripts/EASchema_1220_MySQL.sql
- Save the EASchema_1220_MySQL.sql file in the directory C:\EAInfoport\Dataprojekt
- Start the (line) program MySQL 5.7 Command Line Client
- Log in with the root (administrator) password
- Create the database “ea” using the command *CREATE DATABASE ea;*
- Switch to the database using the *USE ea* command;
- Create the tables needed for Enterprise Architect to work with the command *SOURCE C:\EAInfoport\Dataprojekt\EASchema_1220_MySQL.sql*
- End the program
