

# OpenID

The screenshot shows the 'OpenID' configuration page within a 'Configuration Manager' interface. The page has a blue header with 'Configuration Manager' and a sub-header 'Configuration Manager'. Below the header, there's a navigation bar with tabs: 'Urls', 'Licence', 'Database', 'Active Directory/OpenId', 'App Logs', 'Background Jobs', and 'XFrame Settings'. The 'Active Directory' tab is selected, and the 'OpenID' sub-tab is active. The main content area is titled 'OpenID Section' and contains several configuration fields and sections:

- Active:** A checkbox labeled 'Active'.
- Login using OpenId Groups relations only:** A checkbox.
- Server Realm:** A text input field containing 'https://openid.test.cz/auth/realms/test'.
- Metadata:** A text input field containing 'https://openid.test.cz/auth/realms/test/.well-known/openid-configuration'.
- Client ID:** An empty text input field.
- Client Secret:** An empty text input field.
- Redirect Uri:** A text input field containing 'https://your-uri:443/signin-oidc'.
- Infoport Group for Portal Admins:** A text input field containing '/PortalAdmins'.
- LogoutUri:** A text input field containing 'https://openid.test.cz/auth/realms/test/protocol/openid-connect/logout?redirect\_uri=https://your-uri:443'.
- Claim that belongs to the username:** A text input field containing 'preferred\_username'.
- Claim that belongs to the email:** A text input field containing 'emailaddress'.
- Claim that belongs to the forename:** A text input field containing 'forename'.
- Claim that belongs to the surname:** A text input field containing 'surname'.
- Claim that belongs to the groups:** A text input field containing 'groups'.
- Scope:** A section with three text input fields: 'openid', 'profile', and 'groups'. Each field has a red 'DELETE SCOPE' button next to it.
- Buttons:** A green 'CHECK' button at the bottom left and a blue 'ADD SCOPE' button at the bottom right.

The footer of the page contains three buttons: a blue '← ZPĚT' button, a blue 'CHECK ALL' button, and a red 'SAVE SETUP & TERMINATE SERVER (AFTER THAT YOU MUST START SERVER AGAIN)' button.

- "Active" tells us if we want Infoport to work with OpenID.
- "Login using OpenId Groups relations only" it is possible to set a ban on the login of a user who does not have an OpenID group assigned.

**Server Realm** – fill in the link to the open id server

## Server Realm

https://openid.test.cz/auth/realms/test

**Metadata** – fill in the link to the open id server metadata

## Metadata

https://openid.test.cz/auth/realms/test/.well-known/openid-config
