List of Access Keys

Whenever a user uses the “*Direct Access URL*” option, the key for that URL is saved in the access key list.

If a user no longer wants to be able to access the relevant address without a password through this key, he/she has the option to delete it here.

The list of active access keys is available by clicking on the arrow next to the “*Repository*” tab and in the subsequently expanded submenu on the “*Access Key List*” tab.

The screenshot shows the 'Access tokens' page in a software interface. The 'Repository' tab is selected, and the 'List of Access Keys' submenu item is highlighted. The page displays a table of access tokens with columns for User name, Diagram name, EA Guid, and Creation date. There are 6 entries shown, all for the 'admin' user. At the bottom, there is a 'Transfer access tokens to users' section with a 'Transfer' button.

User name	Diagram name	EA Guid	Creation date
admin	Getting Started	(78D489BF-403C-4883-A787-87D0FE397F88)	11:49:13 2024-01-15

Creating an access key

To add an access key, a user finds an artefact in the repository and runs the detail – then he/she clicks on the arrow to the right to expand the menu and selects the “*Direct Access URL*” – then he/she clicks on copy and at this point the key is added to the access key list.

Transfer of access keys

The screenshot shows the 'Access Tokens' page in a software interface. The page has a blue header bar with navigation links: 'Example 1', 'Search', 'Repository', 'Views', 'Publication', 'Repository Management 1', 'Portal Management 1', 'admin@EainforT3.cz (admin)', and 'Logout'. Below the header, the page title 'Access Tokens' is displayed. A sub-header 'Access tokens of deleted users' is shown. The main content area contains a table with four columns: 'User name', 'Diagram name', 'EA Guid', and 'Creation date'. Each column has a search bar. The table lists six entries, all with 'admin' as the user name. The 'Diagram name' column lists 'Getting Started', 'Getting Started', 'Traceability', 'Domain Based Models', 'Activity Diagrams', and 'Getting Started'. The 'EA Guid' column lists unique identifiers for each entry. The 'Creation date' column lists dates from 2024-01-15. At the bottom of the table, there is a 'Remove' button. Below the table, there is a section titled 'Transfer access tokens to users' with a 'User selection' button and a 'Transfer' button. The 'User selection' button is highlighted with a yellow box.

Transfer access tokens to users

admin [User selection] [Transfer]

At the bottom of the screen, click on "User Selection". After selecting the user, specify which access keys to transfer (using the checkbox). Confirm the selection with the green "Transfer" button.

To transfer access keys, it is necessary that the user to whom we are transferring the key has at least the same permissions on the package.

To remove an access key

In the access key list, the user sees the active keys.

He can use the filter to find the key and if he wants to remove it, he can select it with the left mouse button and then click on the "Remove" button.

List of public diagrams

Access diagrams are available by clicking on the arrow next to the "Repository" tab and in the subsequently expanded "List of public diagrams" submenu.

Whenever the user uses the "URL for public diagram" option, the key of this URL is saved in the "List of public diagrams".

If the user no longer wants to be able to access the corresponding URL without a password, he has the option to remove the key here.

Permissions - Access to publish public keys (permalinks)

There is a new option in Ealfoport to set "Access to publish public keys" for users.

After installing version 8.7.0, users who create permalinks must set the permissions otherwise they will lose this option.

Setting option:

- 1) Portal Management > Users management > Repositories > select the required permissions
- 2) Click on Repository Model > Repository Management > Users Management > Permissions

The screenshot displays the Ealfoport interface. The top navigation bar includes 'Portal Management' and 'admin@EalfoportT3.cz (admin)'. The main content area is titled 'User: List of repositories and permissions' for 'Test Testovic327 (ttestovic327)'. It features a table with columns for various permissions, including 'Access to publish public keys', which is highlighted with a red box. A green message 'Successfully removed' is visible above the table. The bottom section shows a 'Repository Browser' on the left and a 'Testing' model on the right. The 'Testing' model includes a diagram, notes, and a table with details like Name, Type, Stereotype, MDGTechnology, Author, Created, Modified, Version, GUID, ID, and Theme. A red box highlights a button in the right sidebar.
