Audit Logs

Infoport allows you to log changes in the Enterprise Architect database: • changes in Infoport permissions • user logins/ logouts • HTTP status codes from the server We call these Logs Audit and we save it in .csv files.

- Audit Logs - activation
- Saving a record from Audit Logs

Audit Logs - activation

The portal administrator must go to the Configuration Manager and set up the box for the logs he wants to activate. Save the settings and restart Infoport.

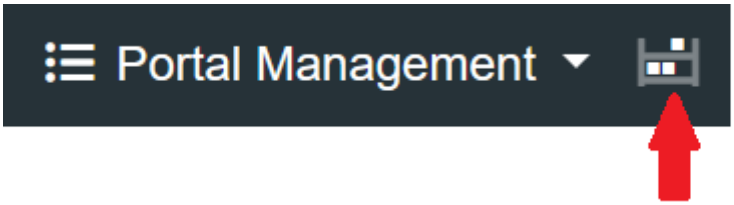

Saving a record from Audit Logs

We save the record from Audit Logs in .csv files.

You can find these new logs on disk in the Infoport folder "\EaInfoportT3\audit\".

The second option is new button that is added next the button Portal Management. It is possible to download a certain log directly from the browser.

The Audit Log is created every hour if one of the listed actions occurs. The name of the audit log always consists of the year, month, day and hour.
