

# Audit Logs

Infoport allows you to log changes in the Enterprise Architect database: • changes in Infoport permissions • user logins/ logouts • HTTP status codes from the server We call these Logs Audit and we save it in .csv files.

- [Saving a record from Audit Logs](#)

# Audit Logs - activation

The portal administrator must go to the Configuration Manager and set up the box for the logs he wants to activate. Save the settings and restart Infoport.

The screenshot shows the 'Configuration Manager' interface for 'Infoport-Platform'. The 'App Logs' tab is selected. The 'Serilog' section is active, showing the 'Serilog Section' and 'Insights' options. The configuration fields are as follows:

LogPath	Log Type	Service Log Write To	RollingInterval
logs	Information	Both	Day

Below the configuration fields, there are four checkboxes for audit logging, with the first one selected and highlighted by a red box:

- ☒ Audit for sign/logout
- ☐ Audit for Enterprise Architect Database modifications
- ☐ Audit for HTTP status codes
- ☐ Audit for Infoport permissions

A green 'OK' button is located at the bottom left of the configuration area.

# Saving a record from Audit Logs

We save the record from Audit Logs in .csv files.

You can find these new logs on disk in the Infoport folder "\\EaInfoportT3\audit\".

Audit overview of csv files			
File path	Name	Date of creation	Last write time
\\EaInfoportT3\audit\audit-2022102213.csv	audit-2022102213.csv	10/22/2022	1:04 PM

Show 10 100 1000 records  
Setup of columns

The second option is new button that is added next the button Portal Management. It is possible to download a certain log directly from the browser.

The Audit Log is created every hour if one of the listed actions occurs. The name of the audit log always consists of the year, month, day and hour.
