Logout of the Application

The user can log out of the application manually or can be logged out automatically due to inactivity.

- Manual Logout
- Automatic Logout

Manual Logout

The user can log out by clicking on the “*Logout*” button (*Depending on the application language setting*).
The user will find this button in the right part of the main menu.

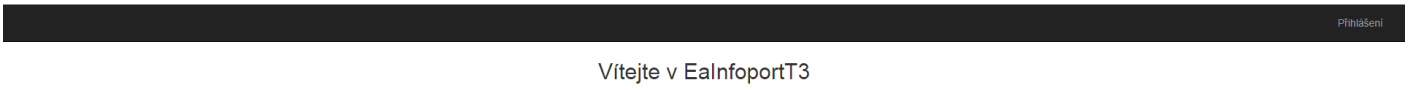

After logging out, he/she is redirected back to the login screen.

Automatic Logout

Automatic logout occurs if the user is idle in the portal for a certain period of time.
This period of time depends on the specific settings of the portal.

After automatic logout, the user is (after another click) redirected to the homepage of the Infoport.
