Assignment Repository and Repository permissions to a user in the portal

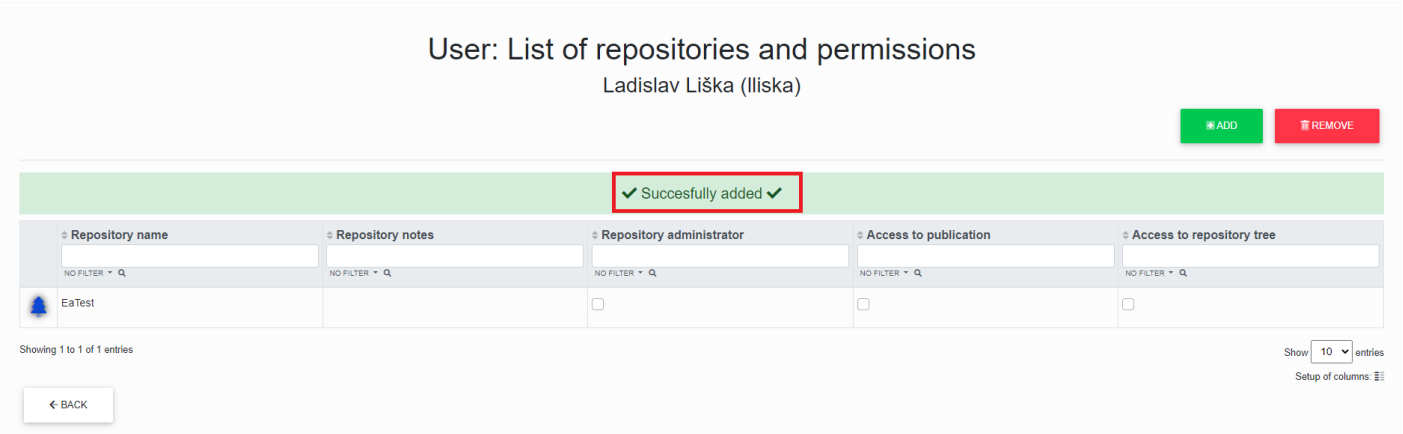

The portal administrator can assign repository and repository permissions to a user.

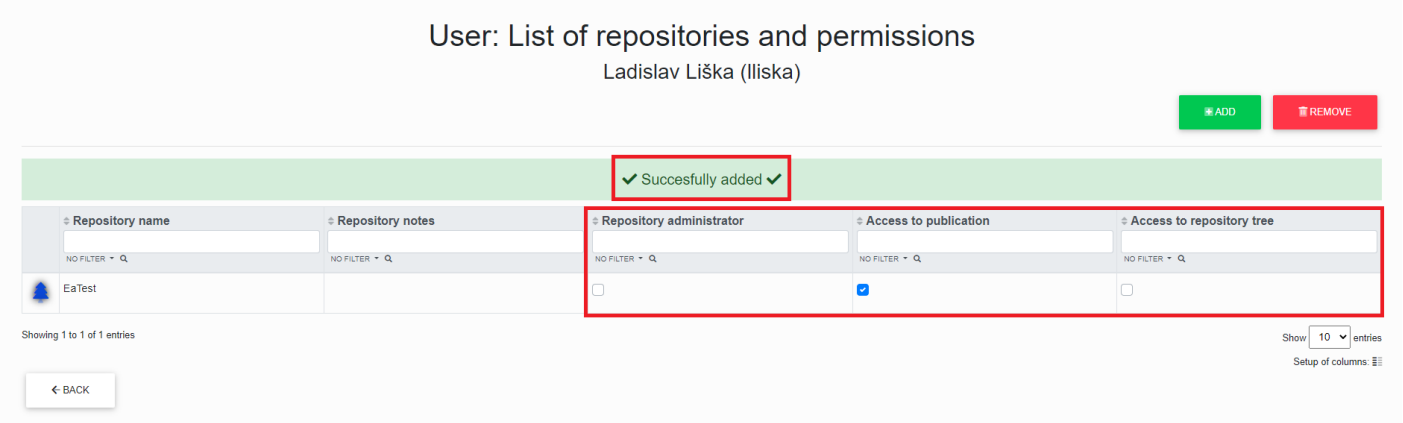

After clicking the "*Add*" button, the administrator is redirected to the table of the user to whom he wants to add the repository and repository permissions.

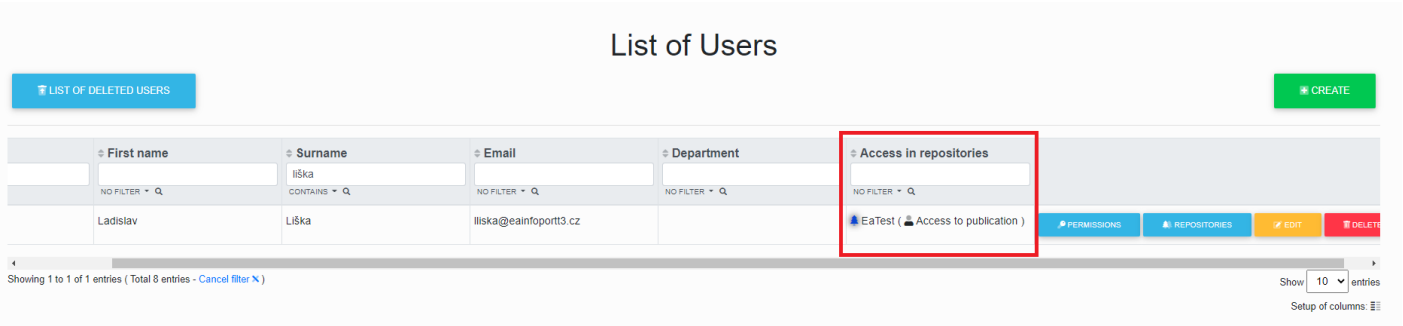

After checking the checkbox, the administrator clicks the "*Add*" button, then the administrator will see the message "*Successfully added*".

Once a repository is added, the portal administrator can assign the repository permissions "*Repository Administrator, Publication Access and Repository Tree Access*".

After clicking on the checkbox, the message "*Successfully added*" is displayed.

Clicking the "*Back*" button will display the "*User List*" with the added repository and the permissions in the repository.
