

Clone

The user can create a copy of an element, a diagram, a package, or an entire structure. If there is a diagram or other elements under the copied element, they will be copied as well. The package is also copied, including the complete contents.

The screenshot shows a software repository interface. On the left, the 'Repository Browser' displays a tree view of packages. The 'Domain Specific Modeling' package is selected, and a context menu is open over it. The 'Clone' option is highlighted with a red rectangle. The right pane shows the 'Domain Based Models' package view, which includes a diagram area with a BPMN diagram and a table of related packages.

Repository Browser

- EA Infoport Demo
- Example Model
 - Call Behavior
 - ArchiMate
 - Classifiers
 - UML Modeling
 - Domain Specific Modeling**
- Demo Bck

Context Menu:

- Open in the new window
- Refresh package
- Add package
- Add element
