Copy EA Address

In EaInfoportT3 it is possible to have a path copied through the tree repository to the relevant artefact.

The functionality is available in the context menu under the symbol 

After clicking on the "*Copy EA Address*" icon, a pop-up chart will appear where the user can get the EA path to the relevant artefact.

After clicking on the "*Copy*" button, the user saves the EA to the clipboard.
An identical method is to select the entire line with CTRL+A and copy it to the clipboard with CTRL+C.
Then just enter the EA path in the appropriate place to search by the EA path.
