Copy URL

A user can copy a URL and send it to a colleague.
The colleague will only be able to view this URL if he/she ***is logged in***; otherwise, he will be directed to the login screen.

This functionality is available in the context menu under the symbol 

After clicking on the "*Copy URL*" icon, a pop-up chart will appear where the user can get the URL of the relevant artefact.

After clicking on the “*Copy*” button, the user saves the URL to the clipboard.
An identical method is to select the entire line with CTRL+A and copy it to the clipboard with CTRL+C.
Then just paste the URL in the appropriate place.
