A user can copy a URL and send it to a colleague.

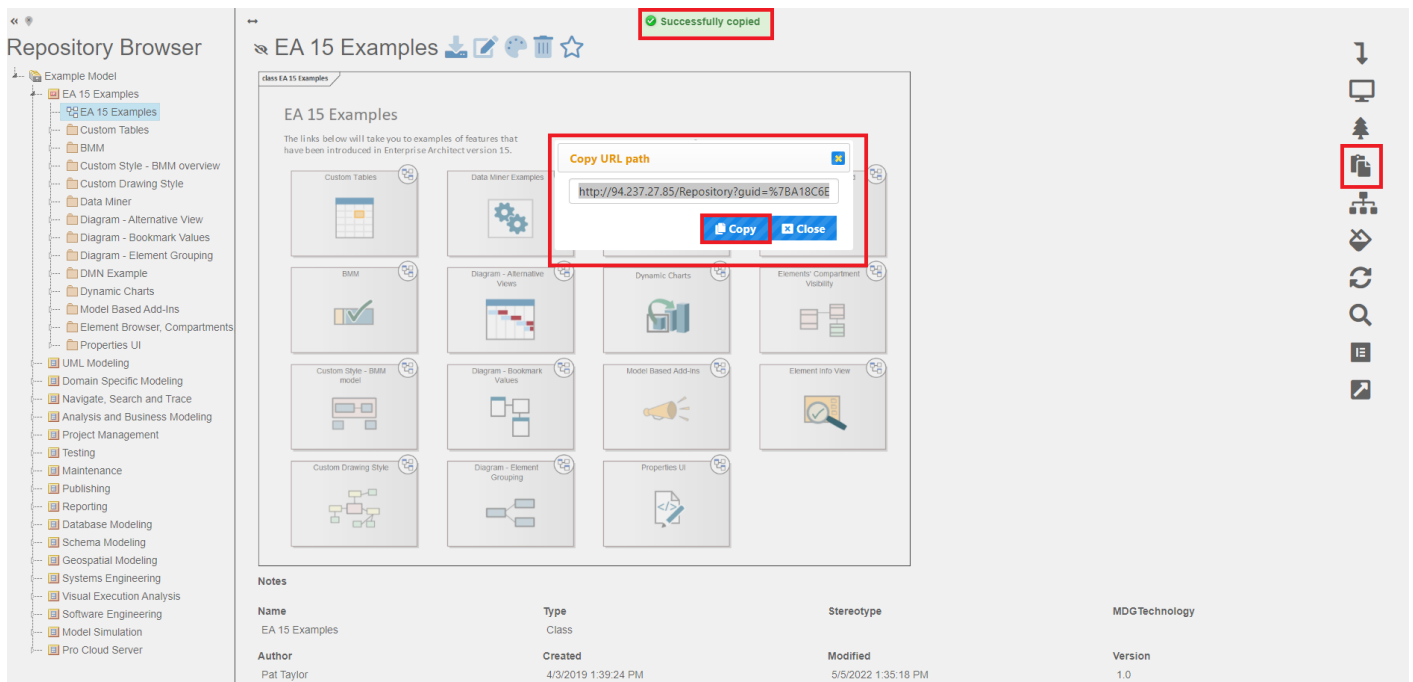

The colleague will only be able to view this URL if he/she **is logged in**; otherwise, he will be directed to the login screen.

This functionality is available in the context menu under the symbol

After clicking on the “Copy URL” icon, a pop-up chart will appear where the user can get the URL of the relevant artefact.

After clicking on the “Copy” button, the user saves the URL to the clipboard.
An identical method is to select the entire line with CTRL+A and copy it to the clipboard with CTRL+C.
Then just paste the URL in the appropriate place.
