

Copy URL

A user can copy a URL and send it to a colleague.

The colleague will only be able to view this URL if he/she **is logged in**; otherwise, he will be directed to the login screen.

This functionality is available in the context menu under the symbol 

The screenshot displays the 'EA 15 Examples' repository page. On the left is a 'Repository Browser' tree. The main content area shows a grid of 16 example diagrams, each with a 'Copy URL' icon. Below the grid is a metadata table:

Name	Type	Stereotype	MDGTechnology
EA 15 Examples	Class		
Author	Created	Modified	Version
Pat Taylor	4/3/2019 1:39:24 PM	5/5/2022 1:35:18 PM	1.0
GUID	ID	Theme	
(A18C6E84-5B6A-4a2d-A531-DFD5CAD10894)	965		

Below the table is a 'Discussion' section with a text input field and buttons for 'Add a thread' and 'Show closed threads'. A note states: 'More detailed control of discussions (editing, deleting, ...) is performed using the context menu'.

After clicking on the "Copy URL" icon, a pop-up chart will appear where the user can get the URL of the relevant artefact.

The screenshot shows the 'Repository Browser' interface for 'EA 15 Examples'. A 'Copy URL path' dialog box is open, displaying the URL `http://94.237.27.85/Repository?guid=%7BA18C6E`. A 'Successfully copied' notification is visible at the top. The main content area shows a grid of example diagrams, and a table of notes is visible at the bottom.

Name	Type	Stereotype	MDGTechnology
EA 15 Examples	Class		
Author	Created	Modified	Version
Pat Taylor	4/3/2019 1:39:24 PM	5/5/2022 1:35:18 PM	1.0

After clicking on the “Copy” button, the user saves the URL to the clipboard.

An identical method is to select the entire line with CTRL+A and copy it to the clipboard with CTRL+C.

Then just paste the URL in the appropriate place.
