Creating a Glossary

To create a glossary, a user must be assigned the "*Portal Administrator, Repository Administrator, or Glossary Editor*" permission.

After clicking on the "*Create*" button, the user is redirected to the "*Create Glossary*" table. The table can be filled with the term, type and meaning.

To create a new type, the user clicks on the "*New Type*" button. After displaying the table and filling in the type, the user clicks on the "*Save*" button.

After saving, the user is redirected back to the table to create the glossary, where they can see the newly created type by clicking the arrow next to the type.
