

Creating a View

If the user has [rights to edit the tree](#), right-click on the "Package" from which you want to create a view and put "Create View".

The message "Successfully saved" appears and the program creates a view.

Procesní model společnosti

Procesy společnosti abc

If the user clicks on the view, it is displayed in the form of a tree. Thus, he sees only the package that has been marked as a view and its complete contents. In this way, it is possible to "pull up", for example, a process model, organizational structure, etc. that is otherwise embedded in the repository structure.

Examples of BPMN process diagrams.
