

EA Path search

If the user chooses to search by PATH, the element located on the specified path is searched.

The screenshot shows the top navigation bar with four tabs: 'Simple', 'Advanced search', 'EA Path search', 'GUID search', and 'Diagram search'. The 'EA Path search' tab is highlighted with a red border. Below the tabs is a light blue instruction bar that reads 'Find an element that is on the specified path (EA Path)'. Underneath, the label 'Path to element' is followed by a text input field containing the example path 'Example Model.Schema Modeling.Schema Composer.Class Model.Store.Store'. To the right of the input field is a green 'SEARCH' button with a magnifying glass icon.

In the "*Path to element*" field the user types or pastes the copied ea path (*it is a sequence of packages and elements separated by a dot*) and clicks on the "*Search*" button.

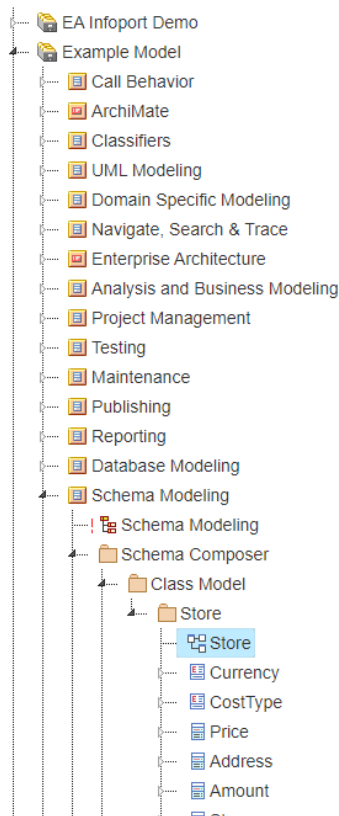

This screenshot is similar to the previous one, but with additional red highlights. The 'Path to element' label and its corresponding text input field, which contains the same example path, are enclosed in a red rectangular box. Similarly, the green 'SEARCH' button is also enclosed in a red rectangular box.

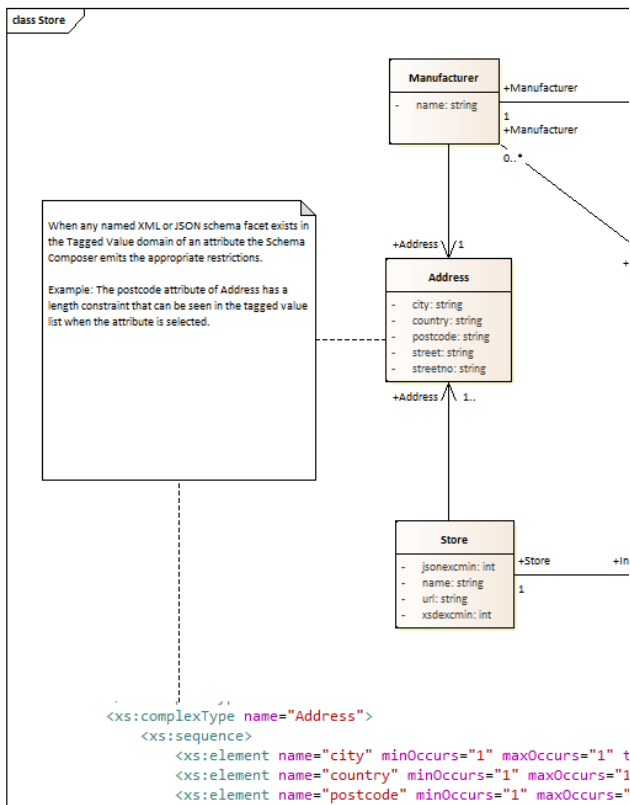

The "*Search*" button redirects the user to the element. The right part shows the artifact detail and the left part shows the artifact marked in the tree.
