

# Elements in the Diagram

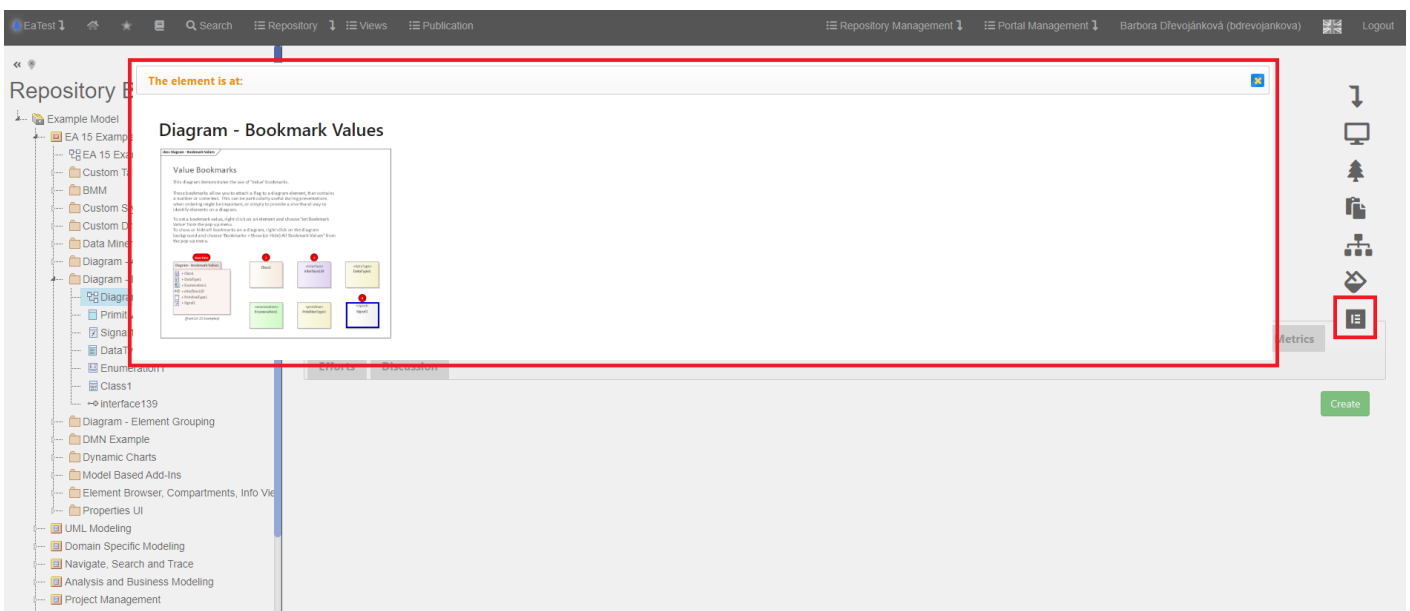

The functionality is available in the context menu under the symbol 

ICON	Name	Alias	Type	Stereotype
	Diagram - Bookmark Values		Package	
	Class1		Class	
	DataType1		DataType	
	Enumeration1		Enumeration	
	PrimitiveType1		PrimitiveType	
	Signal1		Signal	
	interface139		Interface	
			Text	
			Text	

- When a user is in a diagram detail, he/she has the option, after clicking on the “Elements in the Diagram” icon, to display a list of all elements that are in this diagram.
- After clicking on  plus, the detail of the specified element is displayed.
- After clicking on  icon in the ICON column, you get to the specified element.

We got to the “Account” element and selected “Search diagrams with this element” there.

The element is at:

Diagram - Bookmark Values

Value Bookmarks

This diagram demonstrates the use of Value Bookmarks.

Value Bookmarks allow you to save a specific state of a diagram element, such as a class, interface, or signal, and then return to that state at a later time. This is useful for testing and debugging, as it allows you to quickly restore a diagram to a known state.

To create a bookmark, click on the element you want to bookmark, and then click on the 'Value Bookmarks' icon in the right sidebar. To return to a bookmarked state, click on the 'Value Bookmarks' icon in the right sidebar, and then click on the bookmark you want to restore.

Diagram elements:

- Diagram - Bookmark Values
- Class1
- DataType1
- Enumeration1
- PrimitiveType1
- Signal1
- interface139
- Text

- A list of diagrams in which this element is located is displayed, with a preview and highlighting where it appears in them.
  - Double-click on the diagram to get to its detail.
-
