

Find in the Repository Browser

For example, if a user searches for any artefact through the “*Search*”, his/her detail will be displayed, but he/she will not see his/her position in the repository tree.

Thanks to the “*Find in the Repository Browser*” option, the user has the option to expand the repository tree to the appropriate artefact.

The functionality is available in the context menu under the tree symbol 

After clicking on the “*Find in the Repository Browser*” icon, the repository tree will expand to the position of the relevant artefact.
