

Historisation of Published Diagrams

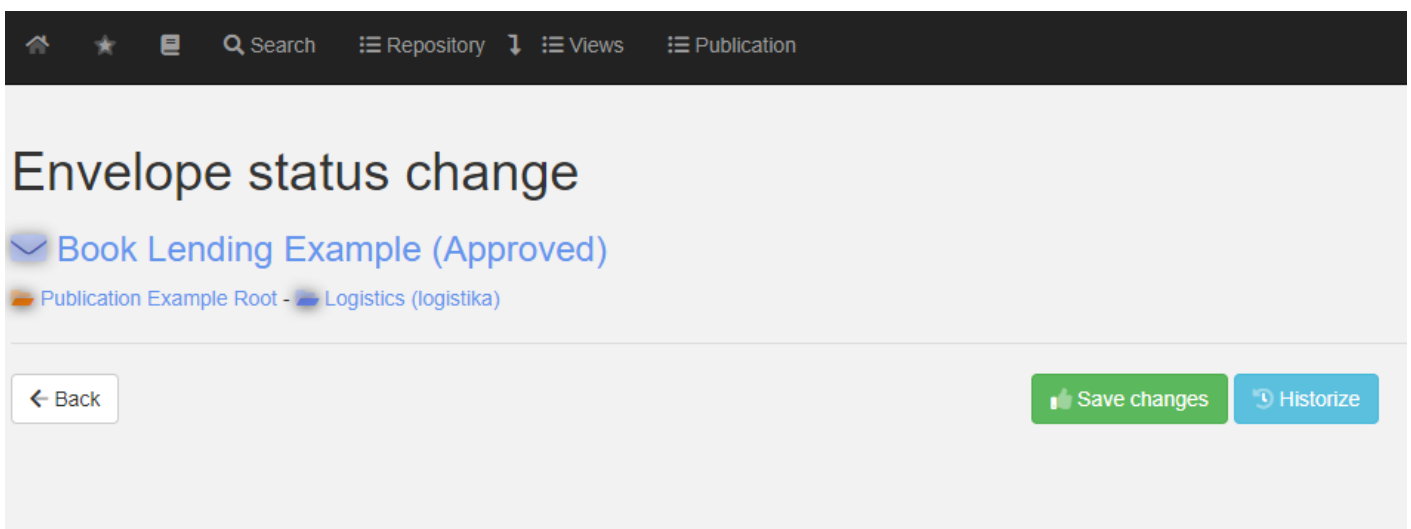

Historical artifacts (these are artifacts that have expired publications) are used to preserve rejected and historicized diagrams.

Because it is still preserved in the Infoport metadata, they can be re-approved if necessary.

On the detail of an approved publication, the user has the option to expire the publication, i.e. historicize it.

The user clicks on "Change Status" to see the "Change Publication Status" detail.

Once the user clicks on the "*Historicize*" button, the publication is moved to the "*Historical publications*".

Book Lending Example

To run the simulation: from the 'Simulate' ribbon, select the 'Start' button, or from the diagram's context menu, choose 'Execute Simulation | Interpreted Simulation'.

```
graph TD
    Start((Start)) --> ReceiveBookRequest[ReceiveBookRequest]
    ReceiveBookRequest --> GetBookStatus[GetBookStatus]
    GetBookStatus --> Decision1{sim_loan == true}
    Decision1 --> OnLoanReply[OnLoanReply]
    OnLoanReply --> Decision2{sim_status == "Decline"}
    Decision2 --> CancelRequest[CancelRequest]
    CancelRequest --> EndEvent1((EndEvent1))
    Decision2 --> HoldBook[HoldBook]
    HoldBook --> RequestHold[RequestHold]
    RequestHold --> HoldReply[HoldReply]
    HoldReply --> EndEvent1
    HoldBook --> TwoWeeks[TwoWeeks]
    TwoWeeks --> Decision1
```

The user can click on the "*Republish*" button and select the section in which to save the publication.
