

List of Access Keys

Whenever a user uses the “*Direct Access URL*” option, the key for that URL is saved in the access key list.

If a user no longer wants to be able to access the relevant address without a password through this key, he/she has the option to delete it here.

The list of active access keys is available by clicking on the arrow next to the “*Repository*” tab and in the subsequently expanded submenu on the “*Access Key List*” tab.
