

List of Access Keys

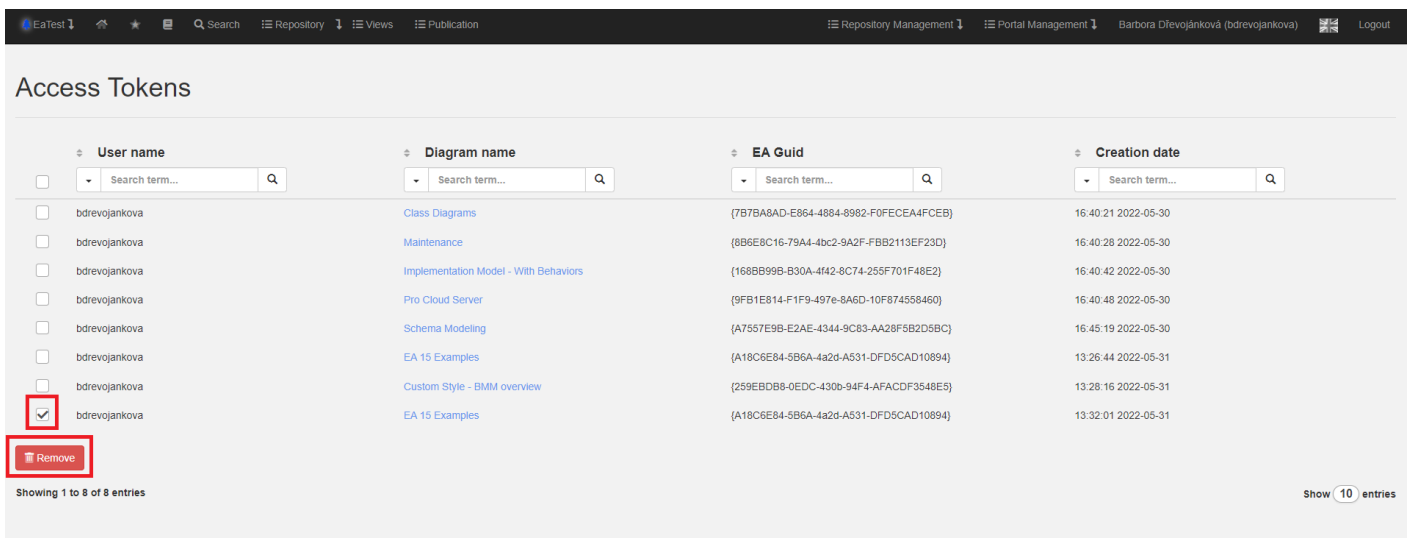

newer versions - <https://doc.eainfoport.cz/books/user-manual/chapter/access-keys>

Whenever a user uses the “*Direct Access URL*” option, the key for that URL is saved in the access key list.

If a user no longer wants to be able to access the relevant address without a password through this key, he/she has the option to delete it here.

The list of active access keys is available by clicking on the arrow next to the “*Repository*” tab and in the subsequently expanded submenu on the “*Access Key List*” tab.

A user sees active keys in the list of access keys.

He/she can use a filter to find the appropriate key, and if he/she wants to remove it, he/she selects this key with the left mouse button and then clicks on the “*Remove Keys*” button.

To add an access key, a user finds an artefact in the repository and runs the detail – then he/she clicks on the arrow to the right to expand the menu and selects the “*Direct Access URL*” – then he/she clicks on copy and at this point the key is added to the access key list.

The key has been added to the access key list.

Access Tokens

|  User name | | | | |  Diagram name | | | | |  EA Guid | | | | |  Creation date | | | | |
