

# Manipulating the tree repository

The user, if he has the appropriate permissions, can move items in the tree (*diagrams, packages, elements but also other artifacts - attributes, operations*). The portal respects EA rules when moving (*anything can be moved under package, diagrams and other elements can be moved under elements, nothing else can be moved under elements*). It also respects locks (*blue/red exclamation marks*), permissions, etc.

It is also possible, from the context menu, to add artifacts - diagrams, packages, elements, but also attributes, operations and more - depending on which artifact the user clicks on. The user can also delete or edit the selected element. It is also possible to change the order of the elements in the package (*move elements up and down*).

## Repository Browser

- Dataprojekt s.r.o.
- Projects
- Projects Ext
- Model Management & Methodology & Training
- Sandbox
  - ISPP
  - IMPORT
  - Dalibor Dřevojánek
  - Demonstrační projekt
  - Petr Kališ
    - Example
      - Open in the new window
      - Refresh package
      - Add package
      - Add element
      - Add diagram
      - Edit
      - Delete
      - Next
      - Last

## Example

Notes

Name	Type	Stereotype	Version
Example	Logical		1.0

Author: Petr Kališ  
Created: 10/27/2020 8:15:54 PM  
Modified: 10/28/2020 8:45:37 PM

ID: 1206 GUID: {FCE24832-BC85-459A-949C-22AD0CE42E62}

Discussion

More detailed control of discussions (editing, deleting, ...) is performed using the context menu

The user can also pull an element from the tree onto the diagram.
