Permissions Management

If we have selected "***Permissions Management***", we will be taken to the Permissions list in the portal.
The portal administrator can assigned a portal administrator to a user.

We have reached the User List.
Here we can assigned or remove portal administrator permissions to different users using the "***Add*** " or "***Remove***" buttons and see a list of users that have the selected permission.

- Assigning Portal Permissions to a user
- Remove Portal Permissions from a user
