Removing Repositories and Repository permissions from a user in the portal

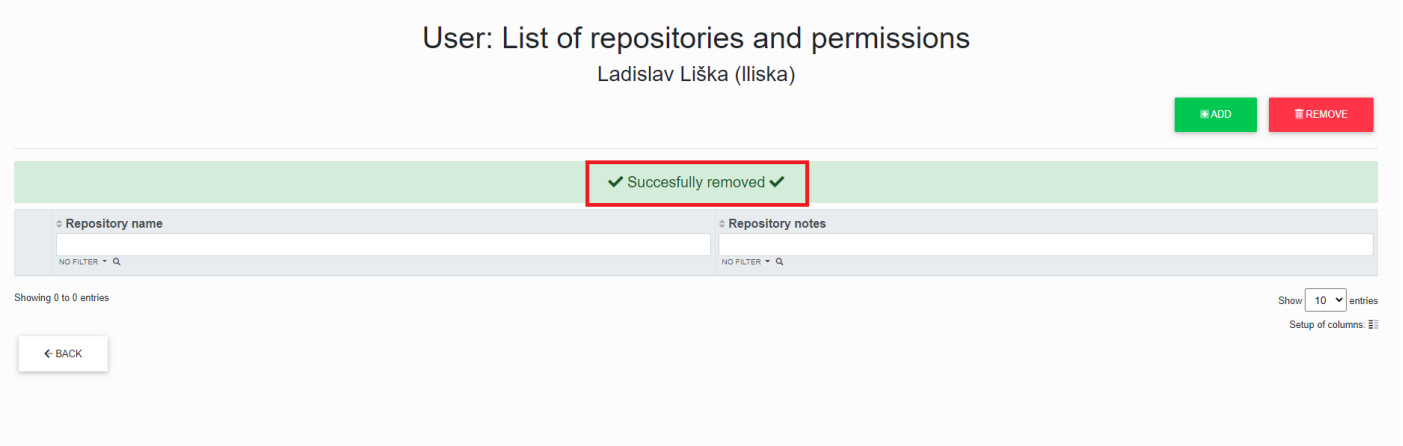

The portal administrator can removed repository and repository permissions to a user.

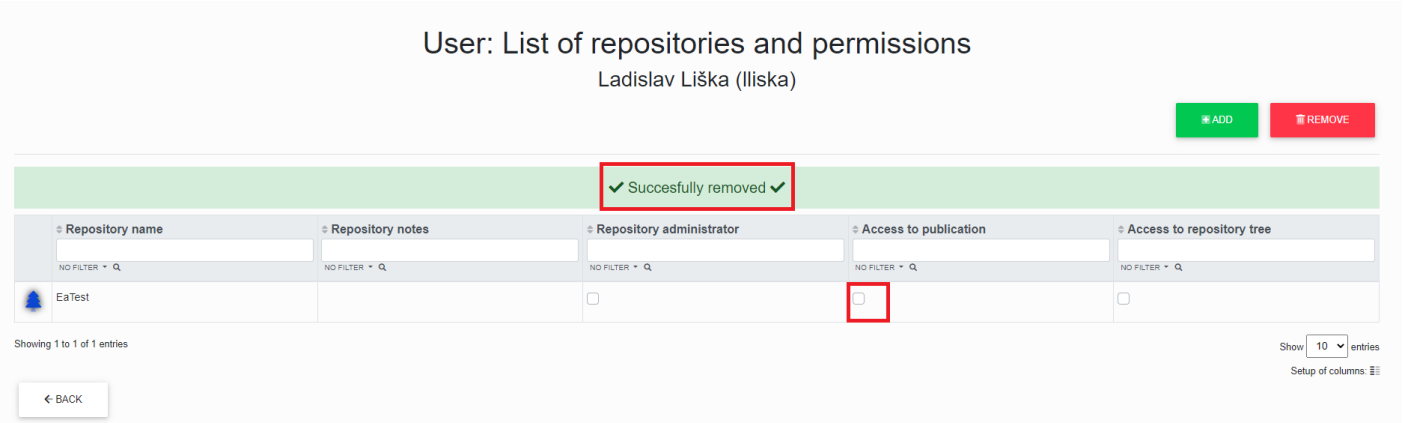

After clicking the "*Add*" button, the administrator is redirected to the table of the user to whom he wants to add the repository and repository permissions.

After checking the checkbox, the administrator clicks on the "delete" button, after which the administrator receives the message "Successfully removed".

After clicking the checkbox, the portal administrator can remove the repository permissions "Repository Manager, Publication Access and Repository Tree Access".

Clicking the "Back" button will display the "User List" with the repository permissions removed.
