Repository Tree Filter

The repository tree filter allows a user to hide/show elements and stereotypes in the tree.

To display the repository tree filters, a user clicks on the arrow next to the "*Repository*" tab and then on the "*Repository Browser Filter*" tab.

There are currently 2 filters available:

- Hide elements in the repository tree
- Display stereotypes in the repository tree

After checking or unchecking a filter, it is necessary to click on the "*Save*" button.
