

Search

The user can choose whether to use search:

- [Simple search](#)
- [Advanced search](#)
- [EA Path search](#)
- [GUID search](#)
- [Diagram search](#)

A screenshot of the search interface. At the top, there is a navigation bar similar to the one in the first image. Below it, there is a search bar with a light blue background. The search bar has a tabbed interface with five tabs: 'Simple', 'Advanced search', 'EA Path search', 'GUID search', and 'Diagram search'. The 'Simple' tab is highlighted with a red rectangular box. Below the tabs, there is a text input field for the search term. To the right of the input field, there is a green button with a magnifying glass icon and the text 'SEARCH'. Below the input field, there are two checkboxes: 'Exact match' and 'Case sensitive', both of which are currently unchecked. A small blue information icon is next to each checkbox label.
