

# Search

The user can choose whether to use search:

- [Simple search](#)
- [Advanced search](#)
- [EA Path search](#)
- [GUID search](#)
- [Diagram search](#)

A screenshot of the search interface. At the top, there is a dark navigation bar similar to the one in the first image. Below it, a light gray box contains the search controls. At the top of this box, there are five tabs: 'Simple', 'Advanced search', 'EA Path search', 'GUID search', and 'Diagram search'. The 'Simple' tab is selected and highlighted with a red border. Below the tabs, a light blue tooltip box contains the text: 'Searches the "Name", "Alias" and "Notes" fields of all elements for the given search term'. Below the tooltip, there is a 'Phrase' label followed by a large text input field. Underneath the input field, there are two checkboxes: 'Exact match' and 'Case sensitive', each followed by a small information icon. At the bottom right of the search box, there is a green button with a magnifying glass icon and the text 'SEARCH'.
