Selection of Preferred Language

Under the flag, you can choose the language of the application.
You can choose from 2 application languages by clicking on the flag icon:

- Czech language
- English language

The choice of language only applies to the translation of the user interface, not to the actual content of the repositories. Changing the language only affects a specific user, i.e., different users may have different UI settings.

After clicking on the appropriate icon, the changes will be saved immediately.
