Tagged values - Enum

Tagged values are created in EA Properties > UML Types > via the "Help" button to get to the Sparx page where you can find the predefined Enum types.

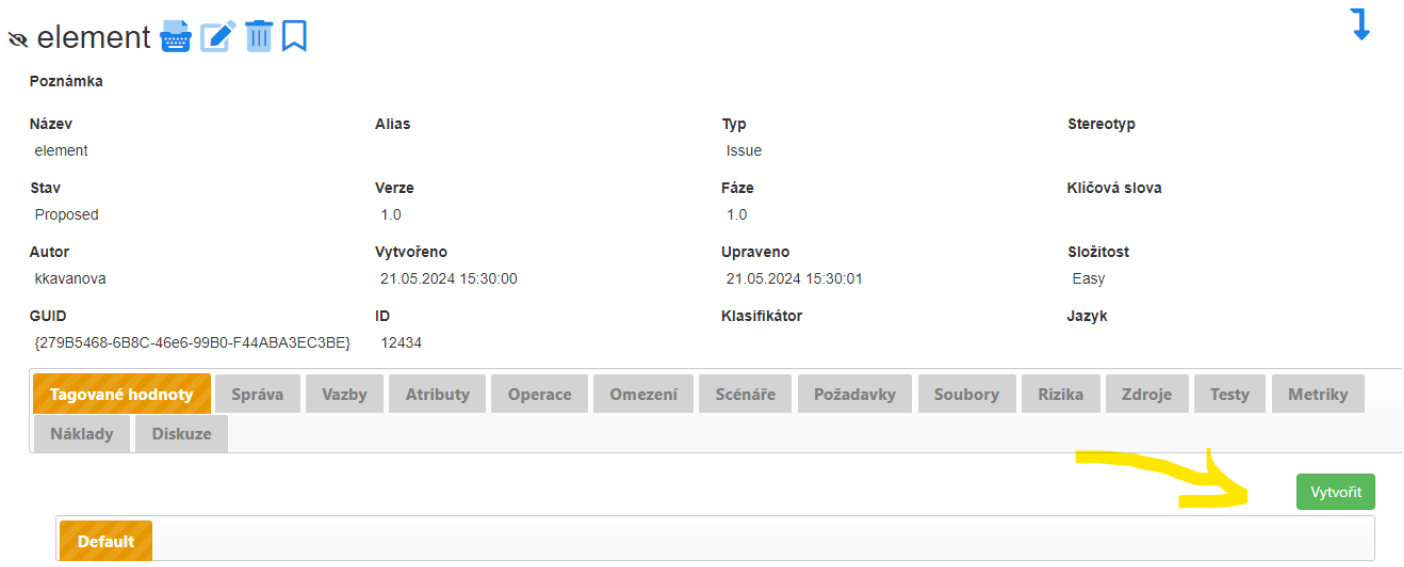

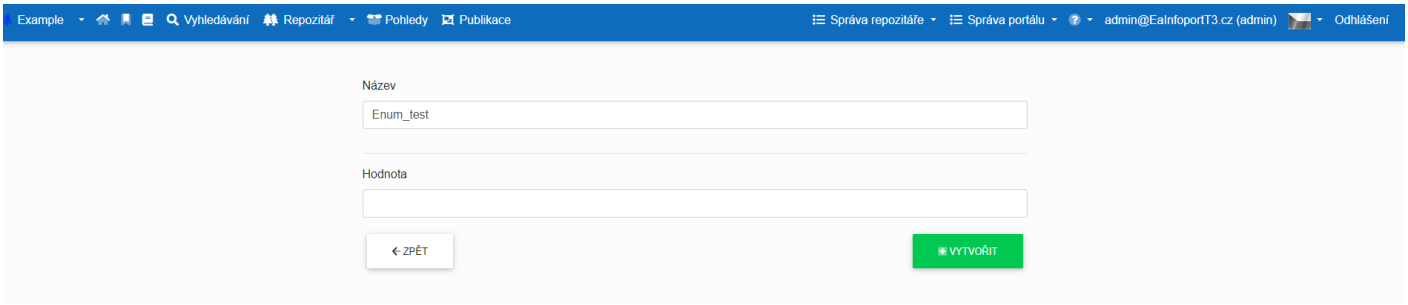

https://sparxsystems.com/enterprise_architect_user_guide/16.1/modeling_frameworks/predefinedtaggedvaluetypes.html

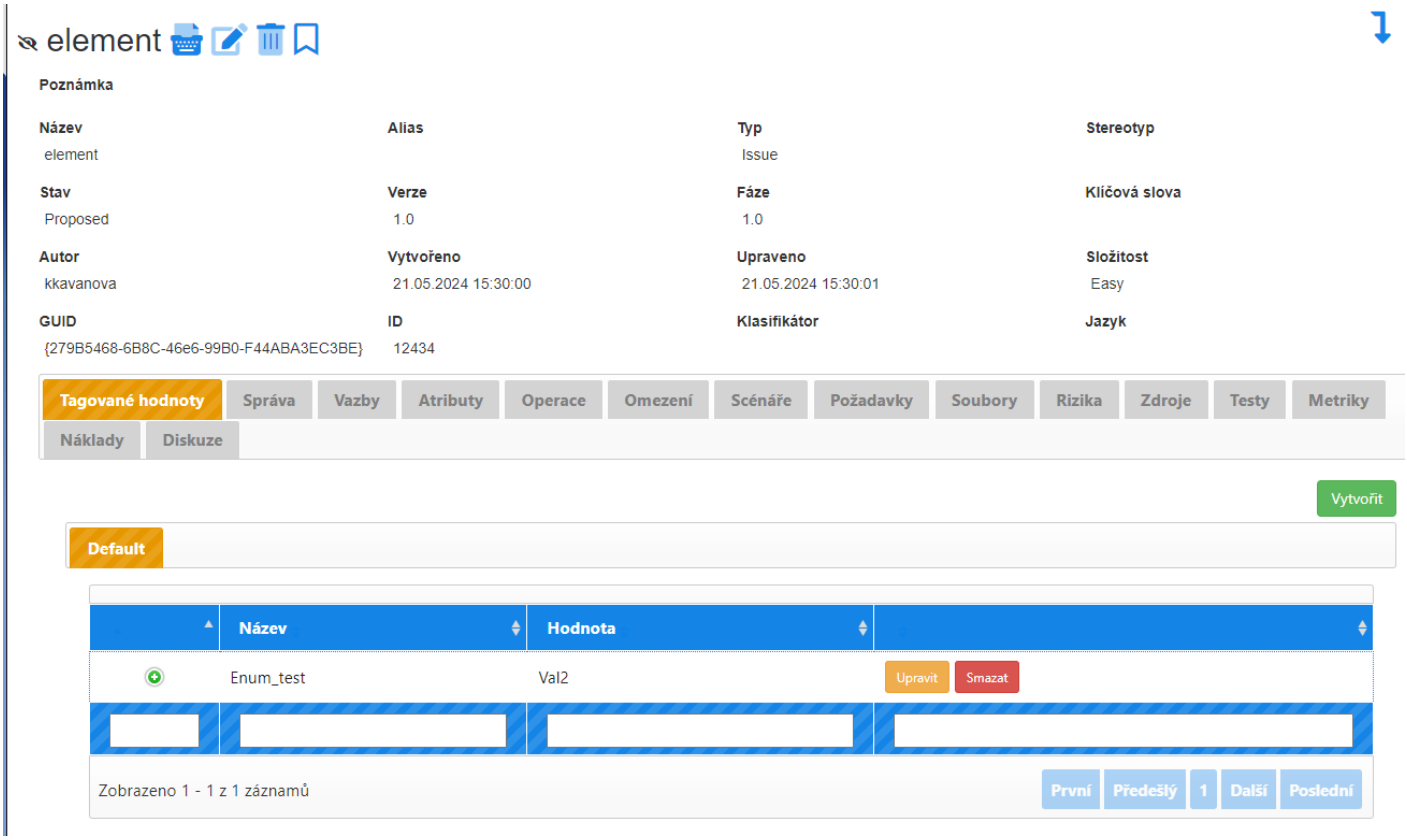

Enum	Type=Enum; Values=Val1,Val2,Val3; Default=Val2; Used to: Define a comma-separated list, where Val1, Val2 and Val3 represent values in the list and Default represents the default value of the list.

In EaInfoport we create a tagged value with the same name:
