

Transfer of access keys

The screenshot shows the 'Access Tokens' page in a web application. At the top, there's a navigation bar with 'Example 1', 'Search', 'Repository', 'Views', and 'Publication'. Below this, the page title 'Access Tokens' is displayed. A sub-header 'Access tokens of deleted users' is visible. The main content is a table with four columns: 'User name', 'Diagram name', 'EA Guid', and 'Creation date'. Each column has a search bar. The table lists six entries for the user 'admin'. At the bottom left, there's a 'Remove' button. At the bottom right, there's a 'Show 10 entries' link. A yellow box highlights a section at the bottom left with the text 'Transfer access tokens to users' and two buttons: 'User selection' and 'Transfer'.

User name	Diagram name	EA Guid	Creation date
admin	Getting Started	(78D499BF-403C-4B83-A787-87DCFE397F88)	11:49:12 2024-01-15

Showing 1 to 6 of 6 entries

Transfer access tokens to users

User selection Transfer

At the bottom of the screen, click on "User Selection". After selecting the user, specify which access keys to transfer (using the checkbox). Confirm the selection with the green "Transfer" button.

To transfer access keys, it is necessary that the user to whom we are transferring the key has at least the same permissions on the package.
