

Transfer of access keys

The screenshot shows the 'Access Tokens' page in a web application. At the top, there is a navigation bar with 'Example 1', 'Search', 'Repository', 'Views', 'Publication', 'Repository Management 1', 'Portal Management 1', 'admin@EahfuporT3.cz (admin)', and 'Logout'. Below the navigation bar, the page title is 'Access Tokens' with a sub-link 'Access tokens of deleted users'. The main content area contains a table with four columns: 'User name', 'Diagram name', 'EA Guid', and 'Creation date'. Each column has a search input field. The table lists six entries, all with 'admin' as the user name. The 'Diagram name' column contains links like 'Getting Started', 'Tracability', 'Domain Based Models', 'Activity Diagrams', and 'Getting Started'. The 'EA Guid' column contains long alphanumeric strings. The 'Creation date' column shows dates from 2024-01-15. Below the table, there is a 'Remove' button and a 'Showing 1 to 6 of 6 entries' indicator. At the bottom, a dialog box titled 'Transfer access tokens to users' is open, showing the user 'admin' selected and a 'Transfer' button highlighted in green.

At the bottom of the screen, click on "User Selection". After selecting the user, specify which access keys to transfer (using the checkbox). Confirm the selection with the green "Transfer" button.

To transfer access keys, it is necessary that the user to whom we are transferring the key has at least the same permissions on the package.
