

Auditní Logy - aktivace

Pro aktivaci Audit logů musí jít správce portálu do konfiguračního manageru a zaškrtnout pole pro logy, které chce aktivovat. Uložit nastavení a restartovat Infoport.

V poli Log Type vybereme "Information". Uvedené nastavení nám zajistí záznam uložený v excel souboru.

The screenshot shows the 'Configuration Manager' interface. At the top, there's a dark header with 'Configuration Manager' and a link to the 'Configuration Manual'. Below the header, there's a navigation bar with tabs: 'Urls', 'Licence', 'Database', 'Active Directory/OpenId', 'App Logs', 'Background Jobs', and 'XFrame Settings'. The 'App Logs' tab is selected. The main section is titled 'Serilog' with a link to the 'Serilog Section'. Under 'Serilog', there's a checkbox for 'Insights' which is checked. Below this, there are four input fields: 'LogPath' (containing 'logs'), 'Log Type' (highlighted with a red box and containing 'Information'), 'Service Log Write To' (containing 'Both'), and 'RollingInterval' (containing 'Day'). At the bottom, there are four checkboxes for auditing: 'Audit for login/logout', 'Audit for Access Keys', 'Audit for Enterprise Architect Database modifications', and 'Audit for HTTP status codes'. All these checkboxes are checked. A green 'CHECK' button is located at the bottom left of the configuration area.
