

# Auditní Logy - aktivace

Pro aktivaci Audit logů musí jít správce portálu do konfiguračního manageru a zaškrtnout pole pro logy, které chce aktivovat. Uložit nastavení a restartovat Infoport.

V poli Log Type vybereme "Information". Uvedené nastavení nám zajistí záznam uložený v excel souboru.

The screenshot shows the 'Configuration Manager' interface. At the top, there's a dark header with 'Configuration Manager' and a link to the 'Configuration Manual'. Below this is a navigation bar with tabs: 'Urls', 'Licence', 'Database', 'Active Directory/OpenId', 'App Logs', 'Background Jobs', and 'XFrame Settings'. The 'App Logs' tab is selected. The main section is titled 'Serilog' with a link to the 'Serilog Section'. Under 'Insights', there are four configuration fields: 'LogPath' (set to 'logs'), 'Log Type' (set to 'Information' and highlighted with a red box), 'Service Log Write To' (set to 'Both'), and 'RollingInterval' (set to 'Day'). Below these fields are four checkboxes, all of which are checked: 'Audit for login/logout', 'Audit for Access Keys', 'Audit for Enterprise Architect Database modifications', and 'Audit for HTTP status codes'. There is also a checkbox for 'Audit for Infoport permissions'. At the bottom left, there is a green 'CHECK' button.
