

Kopírovat EA adresu

V EainfoportT3 je možnost nechat si zkopírovat cestu skrz repozitory tree až k příslušnému artefaktu.

Funkcionalita je dostupná v kontextovém menu pod symbolem 

» C# Model

C# Class Model

This Class diagram represents the MDA transform generated from the Abstract Class model PIM.

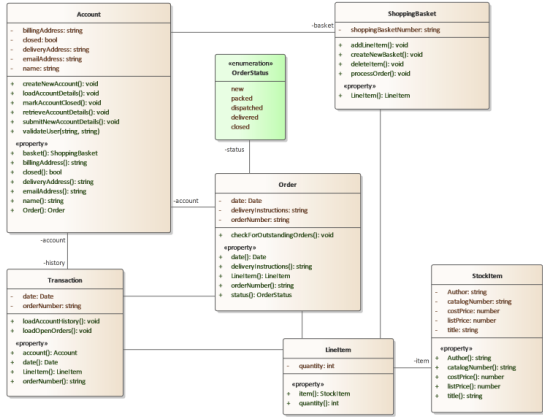

For more information on MDA transforms see:

MDA Transforms

This Class model can be forward engineered to produce C# code.

For more information on processes of code generation, reverse engineering of source code and synchronization between the source code and model - see:

Code Engineering

Account

- Attributes: billingAddress: string, closed: bool, deliveryAddress: string, emailAddress: string, name: string
- Methods: createNewAccount(): void, loadAccountDetails(): void, markAccountClosed(): void, retrieveAccountDetails(): void, subscribeNewAccountDetails(): void, unsubscribe(string, string)
- Properties: basket() ShoppingBasket, billingAddress() string, closed() bool, deliveryAddress() string, emailAddress() string, name() string, Order() Order

ShoppingBasket

- Attributes: shoppingBasketNumber: string
- Methods: addNewItem(): void, createNewBasket(): void, deleteItem(): void, processOrder(): void
- Properties: ListItem() ListItem

OrderStatus

- Attributes: new, packed, dispatched, delivered, closed
- Properties: status

Order

- Attributes: date: Date, deliveryInstructions: string, orderNumber: string
- Methods: checkOutOutstandingOrders(): void
- Properties: date() Date, deliveryInstructions() string, ListItem() ListItem, orderNumber() string, status() OrderStatus

Transaction

- Attributes: date: Date, orderNumber: string
- Methods: loadAccountDetails(): void, loadOpenOrders(): void
- Properties: account() Account, date() Date, ListItem() ListItem, orderNumber() string

ListItem

- Attributes: quantity: int
- Properties: item() StockItem, quantity() int

StockItem

- Attributes: Author: string, catalogNumber: string, costPrice: number, batch: number, title: string
- Properties: Author() string, catalogNumber() string, costPrice() number, batch() number, title() string

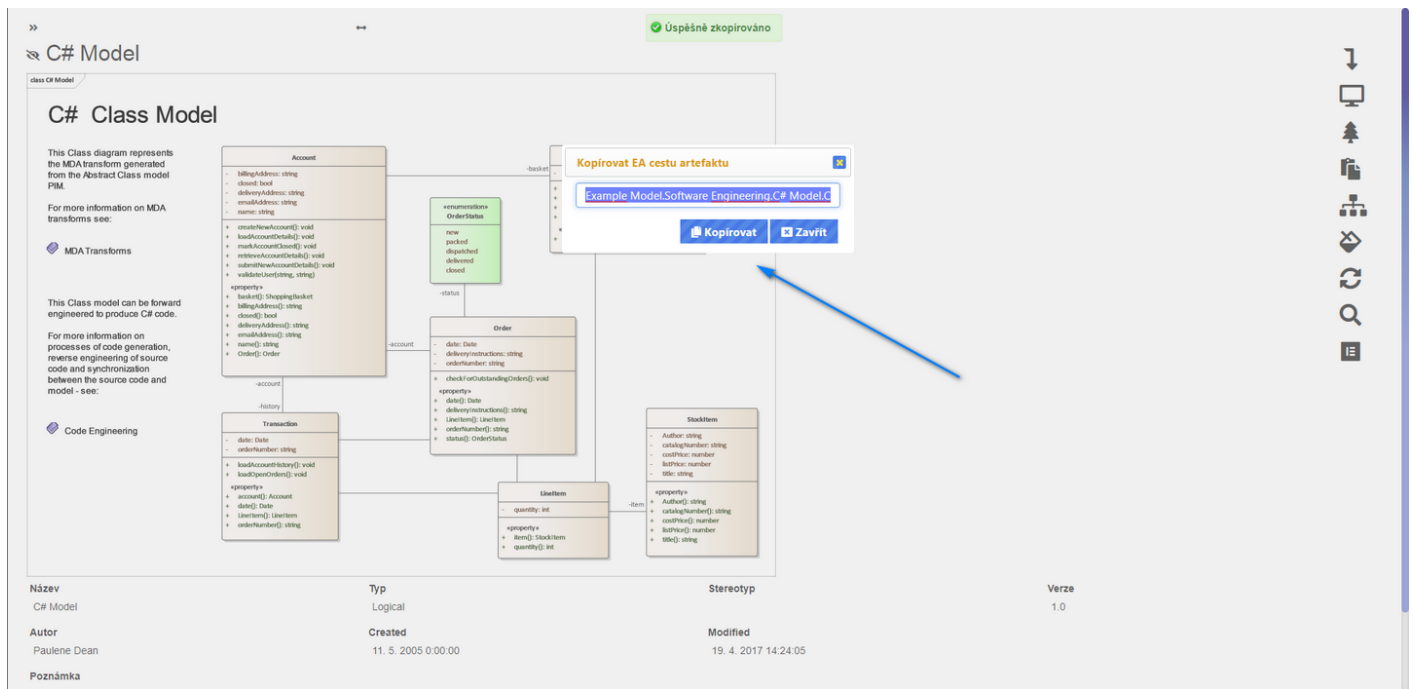

Název	Typ	Stereotyp	Verze
C# Model	Logical		1.0

Autor	Created	Modified
Paulene Dean	11. 5. 2005 0:00:00	19. 4. 2017 14:24:05

Poznámka

→ 

Po kliknutí na ikonku „Kopírovat EA adresu“ se objeví vyskakovací tabulka, kde uživatel může získat EA cestu k příslušnému artefaktu.

Uživatel po kliknutí na tlačítko „Kopírovat“, uloží EA cestu do schránky. Stejný způsob je označit celý řádek pomocí CTRL+A, zkopírovat pomocí CTRL+C do schránky. Následně stačí vložit EA cestu na příslušné místo pro vyhledávání podle EA cesty.
