

Posuvník mezi stromečkem repozitáře a detailem

Posuvník umožňuje rozšiřovat šířku stromečku repozitáře.

The screenshot shows a web application interface. On the left is a 'Repozitář' (Repository) tree view under 'Example Model'. It contains several items, with 'Composite diagram' selected. On the right is a 'Composite diagram' details panel. At the top of this panel, there is a slider control (a small rectangle with a double-headed arrow) that allows adjusting the width of the repository tree. A red box highlights this slider, and a red arrow points to it from the text above. The details panel includes fields for 'Název' (Name), 'Typ' (Type), 'Stereotyp' (Stereotype), 'Autor' (Author), 'Status' (with a dropdown menu), 'Created', and 'Modified'. Below these is a 'Poznámka' (Note) field. At the bottom of the details panel, there is a table with columns 'Name', 'Notes', and 'Type'. The table is currently empty, with a message 'Nenalezena data pro tabulku' (Data not found for the table). Navigation buttons like 'První', 'Předchozí', 'Další', and 'Poslední' are at the bottom right.
