

Posuvník mezi stromečkem repozitáře a detailem

Posuvník umožňuje rozšiřovat šířku stromečku repozitáře.

The screenshot shows a web application interface. On the left is a 'Repozitář' (Repository) tree view under 'Example Model'. It contains several items, including 'Composite diagram'. On the right is a details panel for 'Composite diagram'. The panel has a header with 'Název' (Name), 'Typ' (Type), and 'Stereotyp' (Stereotype). Below this are fields for 'Autor' (Author), 'Status' (with a dropdown menu), 'Created', and 'Modified'. A 'Poznámka' (Note) field is also present. At the bottom of the details panel is a table with columns 'Name', 'Notes', and 'Type'. The table is currently empty, with a message 'Nenalezena data pro tabulku' (Data not found for the table). A red box highlights a slider control between the repository tree and the details panel, with a red arrow pointing to it.
