

Posuvník mezi stromečkem repozitáře a detailem

Posuvník umožňuje rozšiřovat šířku stromečku repozitáře.

The screenshot shows a web application interface. On the left is a 'Repozitář' (Repository) tree view under 'Example Model'. It contains several items, with 'Composite diagram' selected. On the right is a 'Composite diagram' details panel. At the top of this panel, there is a horizontal slider control, highlighted by a red box and a red arrow. The slider is positioned towards the left. Below the slider, the details panel shows metadata for the 'Composite diagram' package, including its name, type, author, status (Approved), creation date, and modification date. There are also tabs for 'Constraints', 'Requirements', 'Files', 'Tagged values', 'Relationships', 'Permissions', and 'Discussions'. The 'Permissions' tab is currently active, showing a table with columns 'Name', 'Notes', and 'Type'. The table is empty, with a message 'Nenalezena data pro tabulku' (Data not found for the table). At the bottom of the details panel, it says 'Zobrazeno 0 - 0 z 0 záznamů' (Showing 0 - 0 of 0 records) and has navigation buttons: 'První', 'Předchozí', 'Další', and 'Poslední'.
